ACCESS Project: descriptions of the action

ACCESS Project - **Against Crime: Care for Elders Support and Security** (ZE4/ AG/2010/1576), financed within the framework of the EU programme "Criminal Justice", aims at identifying good practices and standards for improving capacities of Police Officers, Judges, Lawyers, Practitioners and other Operators who deal with elderly victims of crime.

The intent is to improve the ability of professionals in charge of dealing with crime victims to approach and support the elderly subjected to a crime, in every phase of penal procedure. To reach this goal the project is focused on the development of Guidelines mainly addressed to Police Officers, but also helpful for Judges, Lawyers, Practitioners and other Operators. The Guidelines, combines scientific knowledge and experience gained throughout previous successful actions, describe best practices to approach and support elderly victims of crime.

The Guidelines that will be presented during the Conference, divulget at national and European level, and are intended as a milestone in order to reach of high level standards in elderly victims support.
